DETAILED ACTION***Allowable Subject Matter***

1. Claims 46-67 respectively renumbered as 1-22 allowed.
2. The following is an examiner's statement of reasons for allowance:

Morito et al discloses a disk recorder apparatus for authenticating a disk comprising a digital video signal of at least one camera, recorded onto a fresh disk by a disk recorder, said disk recorder comprising: controller including code generator for generating an exclusive code and a corresponding code signal for said fresh disk, said and a code mixer for ranting said digital video signal and said code signal (Figure 8 shows a controller for generating exclusive code as described in Column 4 Lines 38-45. Additionally, Figure 7 shows the disk identifier Sd mixed on the disk with coded signal Sp). Additionally, it is taught by Miller an auto load disk copier system as seen in Figure 12. The disk copier system provides a pull lever as described in Column 9 Lines 21-26 that allows for movement of disks throughout the system. Furthermore, Figure 12 shows a jukebox copying system that allows for a fresh disk tray compartment for loading new disks as described in Column 9 Lines 1-8 that allows for further transporting of the disks through the system. However, the prior art of record fails to teach, disclose or fairly suggest the following limitation,

"controller including code generator for generating an exclusive code and a corresponding code signal for said fresh disk, said exclusive code including data identifying the data source of the digital video signal recorded on the disk and a code mixer said digital video signal and said code signal."

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
